

## Text

Two new studies have investigated why fewer women , compared to men , study and work in the so-called STEM subjects in the United States : science , technology , engineering and mathematics . The American Association of University Women ( AAUW ) examined existing research . Its report `` Why So Few ? " suggested ways to interest more girls and women in the STEM fields . The researchers found that cultural and environmental factors make a difference . **Researcher Christianne Corbett** says more boys than girls score very high on math

Active query: **Researcher Christianne Corbett**
